THE COMPANY

EARF

Hi-fi and light, cast in tinted acrylic, in eight colors from Ember to Smoke.

EARF is a San Francisco maker of hi-fi and lighting in cast acrylic, tinted all the way through. Every product comes in the same eight colors, from Ember to Smoke, so a room can be one color or three. Each is named for a layer of the Earth. Cast acrylic carries light to its edges, so a lamp underneath fills a whole cabinet with color, and a wall 20 mm thick shows what is inside it.

WHERE	San Francisco, California
SITE	earf.world
INQUIRIES	hello@earf.world; trade and stockists the same
PRODUCTS	Tropos, a powered horn loudspeaker · Hemisphere, a pendant · Core, a table lamp · Mantle, a record player
COLORS	01 Ember · 02 Dust · 03 Acid · 04 Poison · 05 Ice · 06 Haze · 07 Fog · 08 Smoke
SELLS	Made to order; prices set at launch
WHERE IT STANDS	Tropos is drawn for making, part by part: more than eighty parts, each with its fabrication drawing. The horn and the bass were worked out by simulation before any acrylic was cut. Next, the first pair, built as production will build it; then measured, by ear and by microphone. The lamps and Mantle follow the same way
