Mantle: Core (proposal B), details

mm, first angle; from mantle_core.py (round 48). Strata hatched where tinted. A proposal until the owner signs it.

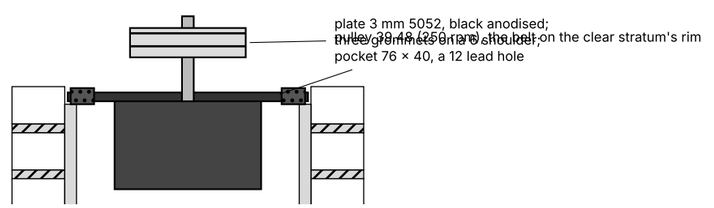

A Bearing, platter and hub, section on the spindle (1:1)

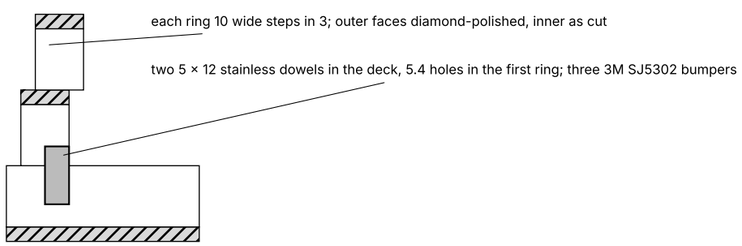

B Foot (1:1)

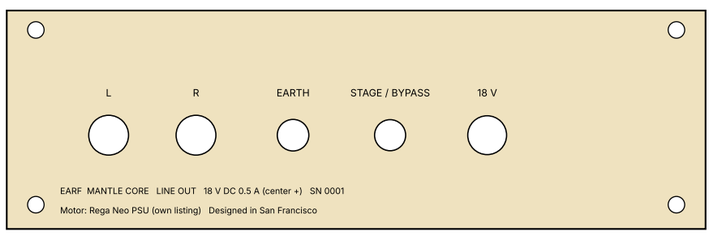

C Motor hung on Rega's grommets (1:1)

D Cover on the deck, back edge (1:1)

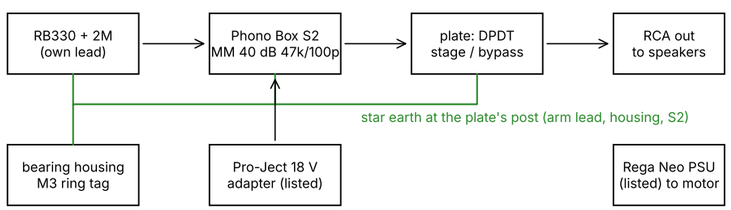

E Back plate and rating (1:1)

2 mm lead-free brass, brushed, the text laser-engraved 0.05 deep and filled black. Compliance marks only after testing (FCC Part 15B for the stage's supply as sold; the S2 and its adapter carry their own).

F Signal, power and earth

Two plugs at the wall, both makers' listed supplies; nothing in Core above 24 V. The motor lead runs in its groove to the back notch, the arm lead in its own, 40 mm apart; no LED, no dimmer, no shared supply.

Fits: spindle 10 g5 / bushes 10 H6 (8-12 um); hub spigot 40 h6 / platter 40.2 H7; the housing a 30.4 clearance bore. Finishes: outer acrylic faces diamond-polished, treads buffed, holes and pockets as machined. Arm height: Rega spacers to a level tube on the first sample.
