THE COMPANY

EARF

Hi-fi and light, cast in tinted acrylic, in seven colors, Ember to Fog.

EARF is a San Francisco maker of hi-fi and lighting in tinted cast acrylic. Every product comes in the same seven colors, from Ember to Fog, so a room can be one color or three. Each is named for a layer of the Earth. A wall of tinted acrylic 20 mm thick shows what is inside it.

WHERE	San Francisco, California
SITE	earf.world
INQUIRIES	hello@earf.world; trade and stockists the same
PRODUCTS	Tropos, a powered horn loudspeaker · Hemisphere, a pendant · Core, a table lamp · Mantle, a record player
COLORS	01 Ember · 02 Dust · 03 Acid · 04 Poison · 05 Ice · 06 Haze · 07 Fog (an eighth, Smoke, held)
SELLS	Made to order; prices set at launch
WHERE IT STANDS	Tropos is drawn for making, part by part: more than eighty parts, each with its fabrication drawing. The horn and the bass were worked out by simulation before any acrylic was cut. Next, the first pair, built as production will build it; then measured, by ear and by microphone. The lamps and Mantle follow the same way
FOUNDER	[FOUNDER]

IN DEVELOPMENT AND NOT YET FOR SALE. EVERY PICTURE IS A RENDER UNTIL THE FIRST ARE BUILT. FIGURES ARE DESIGN FIGURES; MEASURED ONES FOLLOW WITH THE FIRST PAIR. PRICES ARE SET AT LAUNCH. PICTURES: THE SEVEN, EACH ITS OWN STUDIO RENDER.

POWERED HORN LOUDSPEAKER

Tropos

Seven colors, Ember to Fog.

Each cabinet is tinted cast acrylic, 20 mm thick. The horn is one sheet of 10 mm acrylic in the cabinet's own color, formed over a plug and polished, its driver in a pod whose cap twists off by hand. Above 1 kHz the horn carries the music; below, a 15-inch woofer takes it, each on its own channel of the amplifier inside. The lining shows through the walls, so it is dressed in white voile. The name: the troposphere, the air we live in, from the Greek tropos, a turn.

HEIGHT	1293 mm
WIDTH	560 mm, the cabinet, with the horn flush
DEPTH	423 mm overall, 420 mm at the cabinet
WEIGHT	72.6 kg on its own feet
WOOFER	FaitalPRO 15PR400, 15-inch, two ports in the front's lower corners
HORN DRIVER	B&C DE1085TN, 2-inch compression driver
AMPLIFIER	Hypex FusionAmp FA122, built in: two channels of 125 W, crossed at 1 kHz in its DSP
BASS	To about 51 Hz at −3 dB, before the room adds its own; ports tuned to 38 Hz
LOUDNESS	Up to about 115 dB at 1 m, each
INPUTS	XLR (and a link out), RCA, AES, S/PDIF coaxial and optical; USB to set it up
LINING	Polyester batts in white voile
COLORS	All seven; the cover cloth matched to each

IN DEVELOPMENT AND NOT YET FOR SALE. EVERY PICTURE IS A RENDER UNTIL THE FIRST ARE BUILT. FIGURES ARE DESIGN FIGURES; MEASURED ONES FOLLOW WITH THE FIRST PAIR. PRICES ARE SET AT LAUNCH. PICTURE: A RENDER.

PENDANT LAMP

Hemisphere

A quarter turn takes its shade off, and another puts a new color on.

PENDING

Hemisphere: a new render

It goes here when it passes the critics.

A pendant in the speakers' acrylic, frosted within, so the color glows and the source never shows. Hung low over the bar. The shade comes off by hand to wash or to change color. The name: half a globe, hung mouth down.

SIZE	200 mm across
SHADE	Cast acrylic in three layers, tinted, with a frosted layer between
LIGHT	A 575-lumen LED, 2700 K, CRI 90, shielded inside the hub
FITTING	Black anodized aluminum, with a quarter-turn catch
HANGING	A 600 mm drop as standard, cut to length; a black acrylic canopy 150 mm across
MAINS	120 V, dimmable; listing to UL 1598 to follow
SHADES	In all seven colors, sold singly

TABLE LAMP

Core

Goes where the conversation is.

PENDING

Core: a new render

It goes here when it passes the critics.

A ball of tinted acrylic sitting low in a black acrylic base. Cordless, it goes where the conversation is. When the cells tire, you change the cells, not the lamp. The name: the glowing center.

SIZE	160 mm ball, 180 mm tall
WEIGHT	About 1.5 kg
LIGHT	2200 to 2700 K, warmer as it dims
CONTROL	Touch the black ring: tap to switch, hold to dim
POWER	Cordless: about five hours a charge on three standard LiFePO4 cells you can replace yourself; two to three hours to charge
RATING	Designed to meet IP44, for terraces and spilled drinks
SHADES	In all seven colors, sold singly

RECORD PLAYER

Mantle

A record player that floats on its own light.

PENDING

Mantle: a new render

It goes here when it passes the critics.

Its tinted plinth floats 40 mm over a base that glows at its edge. The motor stands apart in a pod of its own, on soft feet, so its hum stays out of the plinth, and the phono stage is built in. The lid's hinges sit on brass inserts, so no screw cuts the acrylic. The name: the layer that moves beneath the crust.

PLINTH	Tinted cast acrylic, 25 mm; it floats 40 mm over the base
BASE	Cast acrylic, edge-lit from within, dimmable
DRIVE	Belt, its motor in a heavy pod of its own
SPEEDS	33 and 45, by a button
ARM	Rega RB330
CARTRIDGE	Ortofon 2M Black
PHONO STAGE	Built in, for moving-magnet cartridges, with a line out and a bypass
COVER	Tinted acrylic, hinged
SIZE	470 wide, 380 deep, 194 high with the lid down (mm)
WEIGHT	About 15.5 kg

IN DEVELOPMENT AND NOT YET FOR SALE. EVERY PICTURE IS A RENDER UNTIL THE FIRST ARE BUILT. FIGURES ARE DESIGN FIGURES; MEASURED ONES FOLLOW WITH THE FIRST PAIR. PRICES ARE SET AT LAUNCH.
