# Mantle

A turntable in cast acrylic.

PENDING

**Mantle: a new render**

It goes here when it passes the critics.

A turntable in cast acrylic. The plinth floats 40 mm over its base. The motor stands apart in a pod of its own, on soft feet, so its hum stays out of the plinth, and the phono stage is built in. The lid's hinges sit on brass inserts, so no screw cuts the acrylic. The name: the layer that moves beneath the crust.

| | |
|---|---|
| PLINTH | Tinted cast acrylic, 25 mm; it floats 40 mm over the base |
| BASE | Cast acrylic |
| DRIVE | Belt, its motor in a heavy pod of its own |
