POWERED HORN LOUDSPEAKER

Tropos

Eight things in the air.

Each cabinet is cast acrylic, 20 mm thick and tinted all the way through. The horn is formed from the same tinted acrylic, its driver in a pod whose cap twists off by hand. Above 1 kHz the horn carries the music; below, a 15-inch woofer takes it, each on its own channel of the amplifier inside. The lining shows through the walls, so it is dressed in white voile. The name: the troposphere, the air we live in, from the Greek tropos, a turn.

HEIGHT	1293 mm
WIDTH	625 mm at the horn, 560 mm at the cabinet
DEPTH	423 mm overall, 420 mm at the cabinet
WEIGHT	About 72 kg; 62 kg with the horn lifted off
WOOFER	FaitalPRO 15PR400, 15-inch, two ports in the front's lower corners
HORN DRIVER	B&C DE1085TN, 2-inch compression driver
AMPLIFIER	Hypex FusionAmp FA122, built in: two channels of 125 W, crossed at 1 kHz in its DSP
BASS	To about 51 Hz at −3 dB, before the room adds its own; ports tuned to 38 Hz
LOUDNESS	Up to about 115 dB at 1 m, each
INPUTS	XLR (and a link out), RCA, AES, S/PDIF coaxial and optical; USB to set it up
LINING	Polyester batts in white voile
COLORS	All eight; the cover cloth matched to each

IN DEVELOPMENT AND NOT YET FOR SALE. EVERY PICTURE IS A RENDER UNTIL THE FIRST ARE BUILT. FIGURES ARE DESIGN FIGURES; MEASURED ONES FOLLOW WITH THE FIRST PAIR. PRICES ARE SET AT LAUNCH. PICTURE: RED-STUDIO-LIGHT.JPG, A RENDER.
