EARF, for the record.

Who we are in two lengths, the particulars, and the pictures at full size. Nothing is built yet, so every picture is a render; we'd be glad if you said so.

About EARF

IN ONE BREATH

EARF is a San Francisco maker of hi-fi and lighting in cast acrylic, tinted all the way through, in eight colors from Ember to Smoke. Its first four pieces are Tropos, a powered horn loudspeaker; Hemisphere, a pendant lamp; Core, a cordless table lamp; and Mantle, a record player.

IN A PARAGRAPH

EARF is a San Francisco maker of hi-fi and lighting in cast acrylic, tinted all the way through, in eight colors from Ember to Smoke. Its first four pieces are Tropos, a powered horn loudspeaker; Hemisphere, a pendant lamp; Core, a cordless table lamp; and Mantle, a record player. Every piece is cut, formed and cemented from the same acrylic, so a speaker, a lamp and a record player can share one color or take three. All four are in development and not yet for sale: each is drawn for making, and the first pair of Tropos will be built, then measured. Planet EARF, a listening bar in San Francisco, is planned.

Names and colors

EARF in capitals. Tropos, Hemisphere, Core and Mantle each take a capital, and so do the colors: Tropos in Ember, not in ember. Every piece comes in all eight.

- **Ember** — Translucent red
- **Dust** — Translucent orange
- **Acid** — Translucent golden yellow
- **Poison** — Translucent bottle green
- **Ice** — Translucent ice blue
- **Haze** — Translucent violet
- **Fog** — Water-clear
- **Smoke** — Smoked black
