FOR RELEASE: [DATE], [TIME] PT · *EMBARGOED UNTIL THEN*

EARF: hi-fi and light, cast in tinted acrylic, in eight colours

San Francisco, [DATE]. EARF makes a horn loudspeaker, two lamps and a record player in cast acrylic tinted all the way through, in the same eight colours: Ember, Dust, Acid, Poison, Ice, Haze, Fog and Smoke. A room can be one colour or three. First shown in San Francisco on 19 January, during FOG Design+Art week, the four pieces are made to order in San Francisco [OWNER: confirm "in San Francisco" once the shops are chosen].

Tropos is a powered horn loudspeaker, 1.3 m tall:

- **The cabinet** is 20 mm cast acrylic, coloured through.
- **The horn** is made from the cabinet's own tinted acrylic. The first pair's horn is built up from 22 layers of tinted sheet, stacked and shaped, so its edges read like strata in a cliff face. [OWNER: say whether production keeps the stacked horn or forms it over a tool; until then, describe only the first pair's.]
- **Above 1 kHz** a 2-inch compression driver plays through the horn; **below**, a 15-inch woofer. Each has its own channel of the amplifier inside.
- **A lamp underneath** fills the whole cabinet with colour.

Hemisphere is a pendant, half a globe hung mouth down, in three layers of acrylic with a frosted layer between. A quarter turn takes its shade off, and another puts a new colour on.

Core is a table lamp, a ball of tinted acrylic on a black base. Plugged in, it stays put; unplugged, it runs about five hours and goes where the conversation is.

Mantle is a record player whose tinted plinth floats 40 mm above a base that glows at its edge, its motor in a pod of its own and a phono stage built in.

Each product is named for a layer of the Earth.

The debut.

- On 19 January the first pair of Tropos played for the first time, at a debut night near Fort Mason during FOG Design+Art week.
- It opened with Session 00: one album, start to finish, before a seated room, recorded live [ARTIST, ALBUM; "through the first pair" only if it was].
- [IF IT OPENED: In February and March, EARF ran a listening room in San Francisco, [ADDRESS], where everything in the room was for sale.]
- **Planet EARF** is EARF's plan for a permanent listening bar and showroom in San Francisco. Everything in the room is for sale, and one coin buys one song. [OWNER: confirm Planet EARF may be named publicly; it isn't on the site yet.]

Availability.

- Made to order, in eight colours.
- **Tropos:** [PRICE] a pair. **Mantle:** [PRICE]. **Hemisphere:** [PRICE]. **Core:** [PRICE].
- **The lamps** are on Kickstarter from [DATE] [only if the campaign is confirmed].
- **The Founding Hundred:** the first hundred pairs of Tropos are numbered [OWNER and COUNSEL: the site's draft says "no money changes hands" and the number is the reward; the money pack drafts a refundable deposit; R4 proposes a Founders' Edition of 8 pairs. Pick one before this line is used].
- Delivery estimates at earf.world. [COUNSEL: any delivery date stated needs a reasonable basis under the FTC's Mail Order Rule.]

Pictures.

About EARF. EARF is a San Francisco maker of hi-fi and lighting in cast acrylic, tinted all the way through. Every product comes in the same eight colours, from Ember to Smoke. Tropos, the flagship, is a powered horn loudspeaker whose cabinet and horn are both cast in the tint. Hemisphere, a pendant, and Core, a table lamp that runs plugged in or not, light the room in the same acrylic. Mantle is a record player whose plinth floats over a base lit at its edge. Each piece is made to order. earf.world
