earf.world: what changes with r47-site-next

Before and after screenshots, 31 October 2026, for the owner's deploy decision. Nothing here is live until the owner says yes. Off and not shown: the waitlist form and its privacy page (waiting on a provider), and the real-time 3D view (a blind critic judged it would hurt beside the renders).

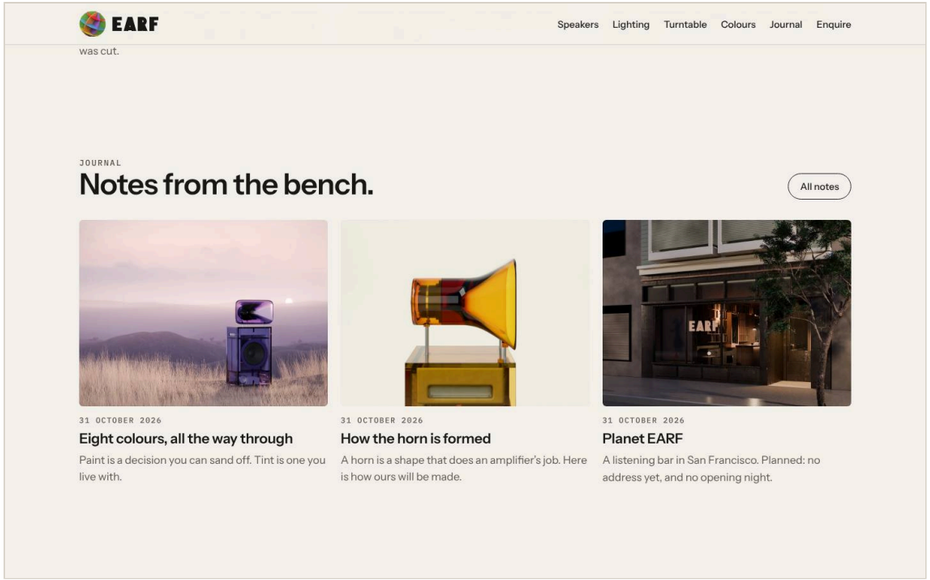

Checks on the branch: 63 routes at 1440 and 390 px, axe (WCAG 2.1 AA), no horizontal scroll, every link; Lighthouse on home and Tropos level with the live site.

Home: "Notes from the bench"

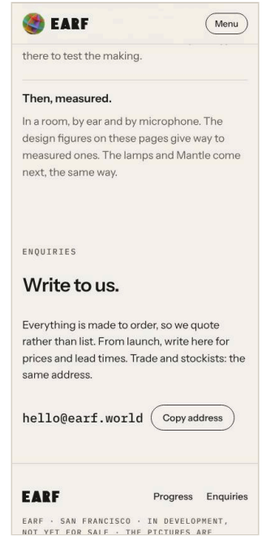

The three journal posts above the enquiries. Before: the enquiries followed straight on.

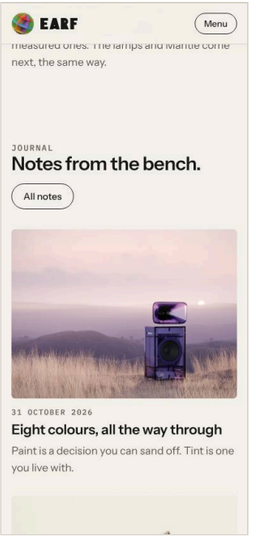

Live now, 1440

Live, 390

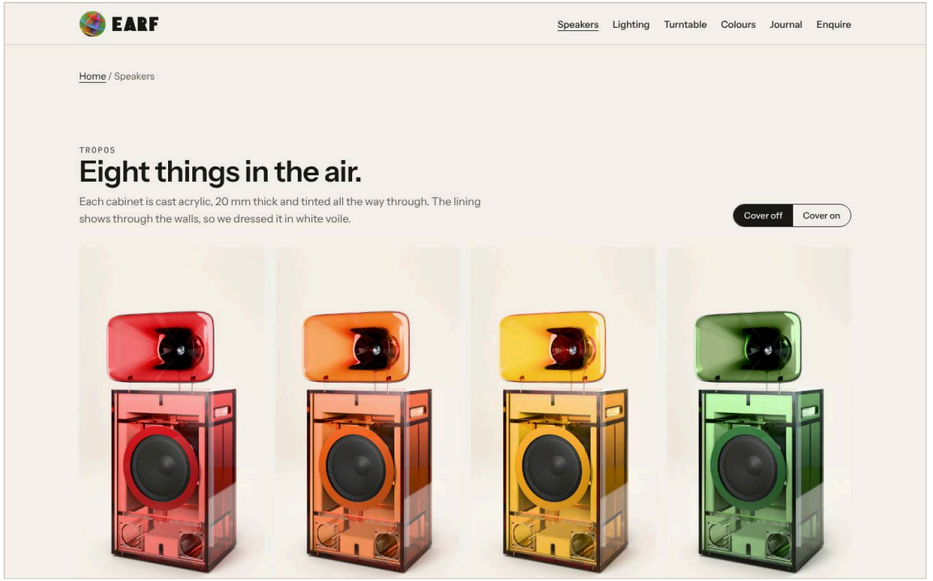

Branch, 390

Header: Journal

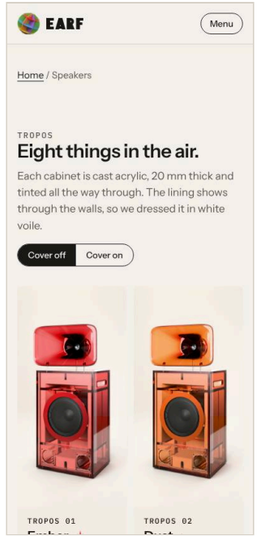

Journal joins the pages in the header (behind Menu on phones); the footer gains Journal and Press.

Branch, 390

Tropos: "Turn it"

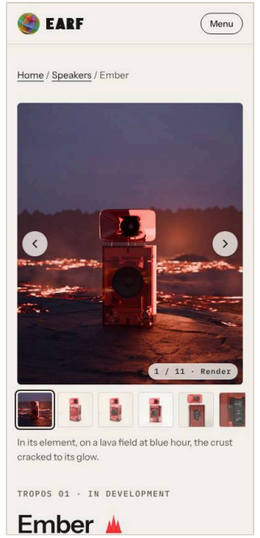

A path-traced, drag-to-turn view in the gallery, the stills' own studio; about 46 degrees either side of face-on. Ember now, the other seven as they render.

Live, 390

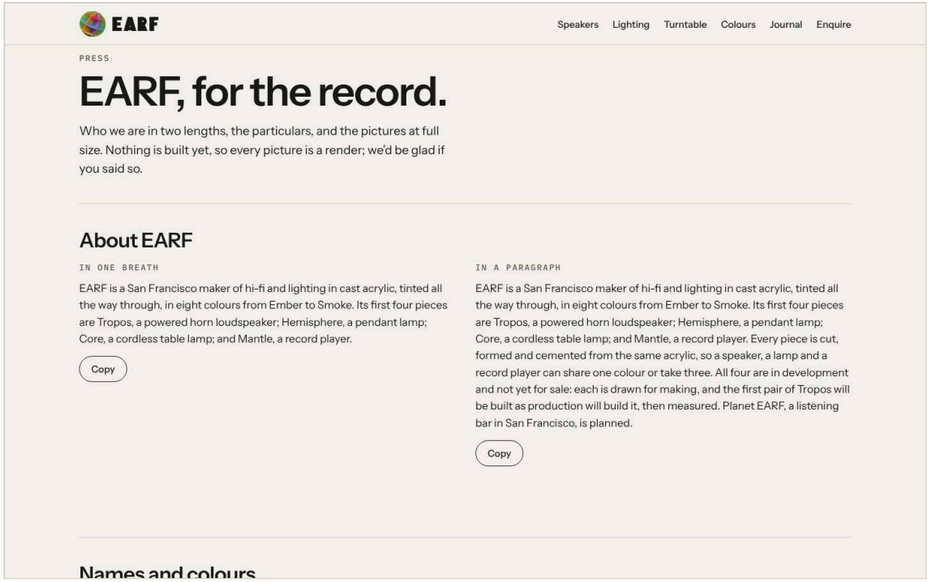

Branch, 390

Press (new)

The boilerplate in two lengths, names and colours, the particulars; founder and press address slots stay hidden until filled.

A journal post (new)

How the horn is formed, from round 36's making, written as plans.
