Materials and lighting. Each acrylic part: its sheet, its tint unlit and lit, how it is lit. Colours are the brand's (the marks' colours; the speakers' acrylic tints are their product files'). All proposals.

Acrylic

	unlit	lit	
Bar front, 8 panels 1050 × 960 20 mm cast			back-lit: white opal liner 4 mm behind, LED tape at 75 pitch in a 75 cavity (pitch = depth: no hot spots) Ember, Dust, Acid, Poison, Ice, Haze, Fog, Smoke, in spectrum order; cast, not extruded (crazing)
Back-bar shelves, display (3 levels) 10 mm light-guide (LD12)			edge-lit: LED in a rear channel 1-3 mm from the polished back edge tinted bay by bay to the bar panel below
Back-bar shelves, working (2 levels) 10 mm light-guide (LD12)			edge-lit, 2700 K, CRI 95+ warm white so the labels read
Back-bar back panel 6 mm opal			back-lit, dimmed low: the bottles in silhouette Fog white
Fog niches' linings (2) 6 mm opal			back-lit from the niche head, 3000 K the Fog pair stand in them
Lounge slats, 75 × 12 at 150 12 mm cast			gap-lit: LED top and bottom in the 75 gap to the absorber one wall of each facing pair only
Screens, bar to lounge 10 mm cast, thermoformed			unlit; the room's light through them Fog, frosted, micro-perforated 0.5 mm at 2 %; 1350 high
DJ recess back 10 mm cast + opal			back-lit, dimmed Ice, behind Cumulus
Plinths (4), booth tables, side tables, DJ desk cladding, uprights 20 mm cast			unlit Smoke, polished

Stone, absorber, membrane and the rest

Bar top and back counter		40 mm honed basalt, sealed; 260 overhang. Never acrylic: spirits craze it.
Ceiling membrane		translucent micro-perforated stretch foil (Barrisol A15/A30 class), NRC 0.55; 0.85 with the absorber in the 570 plenum; back-lit RGBW: the colour clock
Absorber		100 mm mineral wool, dark fabric face: behind the slats and on the opposite lounge wall
Floor		the shell's concrete, ground, honed and sealed (satin)
Booth upholstery		channel-tufted wool velvet, oxblood brown; Smoke plinths
Record wall		black-stained oak cubbies 345, 300 to 550 deep at random (a diffuser), floor to membrane
Window and door		bronze-anodised frames; the door blackened steel, a bronze pull; one neon sign outside
Footrail		50 mm bronze on nine brackets, 200 proud of the panels, 220 high

Lighting

Membrane	RGBW, DMX, graded down the room	the colour clock: Fog + Ice at 17:00, Acid + Dust at 19:30, Ember + Haze at 22:30, Smoke (dimmed warm grey) at last call
Bar panels	RGB(W) per panel, fixed to the panel's colour	always on in their own colour; dimmed with the clock
Shelves	edge-lit LED, 2700 K working / RGB display	the working shelves never change colour
Bell	Fog pendants (6) over the bar; Ember lamps (4) on the booth tables	warm 2700 K, dimmable
Pinhole spots	3000 K, 25-30 deg, in the membrane	one on each corner speaker, one on each Fog niche, five on the bar top, the DJ desk, three down the record wall
Outside	one small neon EARF over the door	the window is the sign

The colour clock (the membrane, door to record wall)

17:00 opening: Fog + Ice	19:30 sunset: Acid + Dust	22:30 late: Ember + Haze	01:45 last call: Smoke

Materials and lighting

Planet EARF: Listening bar, Hayes Valley, San Francisco (a proposal)
